Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 09 August 2007.

DETAILED ACTION

Rejections Withdrawn

1. The 102(e) rejection of claims 1-4 anticipated by Tani et al. has been withdrawn due to applicant's amendment filed on 8/9/2007.

New Rejection

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Osawa (JP 11354116A english translation).

Osawa discloses a nickel metal hydride storage battery comprising a positive electrode comprising nickel hydroxide as a active material (paragraph 0022), a negative electrode comprising a hydrogen absorbing alloy containing aluminum as a component of the alloy (paragraph 0006), a separator and an alkaline electrolyte (paragraph 0022), wherein an aromatic carboxylic acid which forms a complex with aluminum ions is included in the negative electrode (paragraph 0012).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 1745

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Osawa in view of Sakamoto et al. (6255019).

Osawa discloses the battery described above. Osawa fail to disclose a layer comprising hydroxide or oxide of an element selected from the group consisting of calcium, strontium scandium, yttrium, lanthanoids and bismuth is formed on a surface of the positive active material.

Sakamoto et al. teaches a layer comprising yttrium oxide that is formed on a surface of the positive active material for the purpose of improving the charging efficiency at high temperatures (col. 5 lines 8-10).

Therefore, it would have been obvious to one having ordinary skill in the art at the time applicant's invention was made to provide Osawa with a layer comprising yttrium oxide that is formed on a surface of the positive active in order to improve the charging efficiency at high temperatures (col. 5 lines 8-10) as taught by Sakamoto et al.

Response to Arguments

4. Applicant's arguments with respect to claims 1,3 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
